Jordan Hristov
Biomonitoring Ltd
Sofia, Bulgaria

Dear Jordan Hristov,

On behalf of Ecotan Ltd, I would like to express our deep gratitude for the professional commitment of you and your company in conducting a field survey of migratory birds in an area subject to windfarm development. The data collected was used to assess the potential impact of the development project on birds migrating across the area.

We are very grateful that Biomonitoring dealt with remarkable precision, responsibility and full understanding of the task assigned. With extremely profound knowledge on bird identification, the survey was conducted in an objective manner. In addition, the task outputs suggest great attention to detail regardless of the unfavourable field conditions and no compromise in the proficiency of the task fulfilment. It was conducted without any need for supervision and the survey outputs were submitted on time within the agreed time schedule. The data collected suggests that you have dealt with precise assessment of situation with quick decisions in full compliance with migratory bird observation standards.

We are grateful to Biomonitoring Ltd for its professional service and would be happy to subcontract it on future occasions if opportunities arise. We consider the company as a loyal and reliable partner and would recommend its services to anyone planning ornithological surveys.
